## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 70-98, drawn to purification method involving cell growth conditions and a process other than CsCl centrifugation, classified in class 435, subclass 239.
- II. Claims 99-128, drawn to purification method involving lysis method other than freeze-thaw, classified in class 435, subclass 239.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the purification process can be used separately, as the lysate required in group I can be done by freeze-thaw, and the lysate in group II can be purified by CsCl gradients. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1648

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
